INTRODUCING

HomeSTAR

>>Simply Powerful >>Easily Affordable

Sales Tracking, Analysis & Reporting System

Do you:

- build, sell, rent, or manage real estate?
- pre-qualify buyers and maintain a buyer pipeline?
- track options, unit amenities and pricing?
- track buyer traffic, contracts and sales activities?
- have to comply with income and price requirements?
- want to take control of your real estate portfolio?

If you said yes to any of these questions, *HomeSTAR is for you!*

*Home*STAR provides the *functionality* and *flexibility* to track and manage every aspect of your housing portfolio. Developed by experienced real estate professionals, it provides an intuitive user-friendly interface that is easy to navigate, and powerful search capabilities to quickly and accurately retrieve information.

*Home*STAR works with Microsoft Access, SQL Server, or Oracle. It is fully integrated with Microsoft Excel, Word, Outlook, and Crystal Reports to provide sophisticated reports and analysis. But don't take our word for it. Ask for a demo of this unique *all-in-one solution.*
